

In jQuery if you don't want to download jQuery library locally, then you may use CDN.

CDN stands for Content Delivery Network.

You may add following CDN entry in .html file to get access to jQuery library via network

```
<script src="https://code.jquery.com/jquery-3.7.1.js" integrity="sha256-eKhayi8LEQwp4NKxN+CfCh+3qOVUtJn3QNZ0TciwLP4=" crossorigin="anonymous"></script>
```

<code>document.getElementById("mydiv").innerHTML</code>	<code>\$('#mydiv').html(), \$('#mydiv').text()</code>
---	---

`<div id="mydiv">This is div</div>` → `$('#mydiv').text()`

`<div id="mydiv"><h1>This is div</h1></div>` → `$('#mydiv').html()`
